RE: Exports of New Basel Convention Code B3011 plastic wastes from Great Britain: response deadline April 9th

Dear [REDACTED],

Regarding your e-mails and letters I would like to inform you that legal procedure took longer than it was expected and B3011 on plastic waste is not approved yet and we think that it will be approved in the nearest future..

According to the our legislation hazardous waste import and transit is prohibited in Georgia.

Non-hazardous waste shipment is implemented according to the Basel convention and relevant national legislation.

Thank you for your kind cooperation.

Bests regards,
[REDACTED]

Subject: Exports of New Basel Convention Code B3011 plastic wastes from Great Britain: response deadline April 9th

Good Afternoon,

We have contacted you on a number of occasions in respect to understanding what controls should be applied when moving B3011 plastic wastes from Great Britain to your country.

We are currently preparing our legislation and would like to include your import requirements.

We have not yet received a response. If we do not receive a response by the **9th April** we will assume that all future shipments of B3011 plastic waste from Great Britain to your country will be subject to the Basel Convention procedure of prior written notification and consent.

Kind Regards,

[Redacted]
